SPARE COPIES .....

Settlement- Resettlement- (South Kanara)-- Udipi Taluk-- Kakkunje village-- S. Nos. 33/7 and 74/27- wrong description--Rectification- Orders- requested.

- - - - - - -

In the old Settlement Register of V. No. 27. Kakkunj Udipi taluk, S. Nos. 38/7 (1 acre.14 cents) and S. No.74/2 0.45 cents) were classed as wet III and wet I and assessed at Rs.2/- and Rs.7/8 respectively. The register holder of these lands has put in a petition stating that the fields are on a high level and not at all fit for wet cultivation and that their classification as wet at the last Settlement was a mistake. On inspection by the Settlement staff, the petitioner's statement is found to be correct. Survey No. 38/7 is a jungle containing wild miscellaneous trees, situated on a high level stony and unfit for wet cultivation. Survey No. 74/27 is about 25 feet higher in level than the adjoining wet lands and the state of things on ground -- discloses that the field is a plain ground with no signs of wet cultivation. Local enquiry also shows that the present condition of the lands is not due to any change subsequent to the last Settlement but that they were in this state even at the time of the last Settlement. I therefore consider this as a Settlement error and request that the Board may be pleased to direct the correction of the mistakes and the registry of the fields as dry 7-4-4 Rate Re.1/- in the

the Resettlement Accounts.

~~Order~~ ~~Mis.~~ ~~Resolution~~ ~~Rout.~~ No. F-4102/35-1, dated 28 — 10 — 1935.

According to the Sett. Register for the village the class of soil shown against S. No 74/27 is 7-2. The S.S.O. is requested to report whether he proposes to register the soil as 7-4 dry. It is presumed that the classification is suggested after personal inspection of the soil and that it is the appropriate one. The S.S.O. is requested to report whether this presumption is correct.
